

alphaCLICK Cylinder Adapter – Upgrade

The *alphaCLICK* cylinder adapter has an improved design with a reduced hand-wheel diameter of the cylinder valve adapter and with integrated spanner flats for tight mounting.

Features & Benefits

SAFETY – avoids unintended loosening. The spanner flats allow easy attaching of the adapter with a defined torque above tightening by hand (32mm torque wrench with torque set to 20 +/- 2 Nm)

Old version

New version

New and complete breathing apparatus with *alphaCLICK* are offered in combination with the SingleLine pneumatics within AirMaXX and AirGo. It is possible and approved to retrofit the *alphaCLICK* coupling also to the existing AirMaXX, AirGo or BD96, also with a 500E pressure reducer.
